

Anaerobics	Type	Information
D22	Bearing Grade	Medium to high strength
D33	Penetrating Grade	Low viscosity, works with capillary action for hairline cracks
D44	Screw Grade	Low strength, ideal for small screws, good anti vibration properties
D55	High Strength Retainer	Very high strength for permanent bond, can be use with gaps up to 0.25mm
D66	Stud Grade	Fast curing, high strength, ideal use with transmission and engine blocks
D77	Nut Grade	Fast curing, medium strength, for retaining cylindrical parts, works with stainless
D88	Retaining Grade High Temperature	High strength for permanently bond rigid parts, high temperature properties
D888	Hydraulic Grade Thread Sealant	Fast curing, high performance for thread sealing pipes and fittings

All available 24/7 through our customer support programme
