

Cyanoacrylate	Type	Information
CYNO03	Ultra low viscosity	Fast bonding with rapid attainment of full adhesive strength
CYNO040	Low viscosity	Ultra fast bonding, used on many industrial applications, versatile in many areas
CYNO GEL	Gelled adhesive (5 second set)	For bonding, wood, cork, leather, card, metals, and some plastics
CYNO110	Medium viscosity	Very clear cured product, suited to elastomers such as EPDM and SBR also metal
CYNO1200	Medium/High viscosity	For use where slight uneven surfaces are present on metals, plastics, rubber etc
CYNO2000	Cyanoacrylate rubber toughened	Enhanced properties for shock resistance, very good performance in humid areas
D400	Turbo super glue	One shot tube, multi purpose glue, convenient for a tool box accessory
D403	Extra super glue	One product form multiple applications, viscosity Low/Medium
D408	Extra super glue	General purpose cyanoacrylate glue, ideal for steel, brass, leather, rubber

All available 24/7 through our customer support programme
